

Import Procedures & Documentation Course

Before you go global - get educated.

Become a confident importer with a sustainable import business. Equip your staff with practical solutions, and the course will be a return on your investment for the future.

The import procedures and documentation course covers the following key topics in international trade:

- Understand the Trade Life Cycle and how it relates to your import business
- Learn how to develop an import plan
- Australian import requirements- cutting through the red tape
- Terms of trade- what are Incoterms and why are they important?
- Import Documentation- what are the requirements for importing?
- What problems can be experienced when preparing import documentation?
- How to manage your import risks- what types of Insurance can protect your imports?
- What is the role of a customs broker/forwarder and how can they help your import business?

**Australian
Institute
of Export**
